

Developer in Test Engineer

We are looking for a highly motivated C# Developer in Test to work on automation at the API layer. You will be working on a Greenfield SAAS project within a quality conscious Scrum team to define and implement automated test suites to satisfy and cover feature requirements. Maximising reusability, maintainability and flexibility are important aspects to consider.

You will be expected to adapt to challenges, communicate clearly and effectively and display the ability to work individually or as part of a team.

We offer on job training and mentoring along with a great training budget. Self-guided research and learning is also a recognised aspect of the job. You will quickly acquire knowledge of financial reporting and ERP systems, as well as relational database technology.

Essential Requirements

- Good coding skills in C# or Java
- Experience using XML
- Understanding of relational database design and SQL
- Estimation, work breakdown and test coverage needs from requirements
- Understanding engineering changes to identify risk areas and mitigation plans
- Investigate software defects and identify root cause
- Strong communication, interpersonal and problem-solving skills
- A strong BSc Honours degree in IT
- A proven track-record of delivering results in the commercial sector

Desirable / Beneficial Skills

- ERP experience with either JD Edwards or EBS (Oracle E-Business Suite)
- 1 year + experience automating at the API layer
- Experience of working in an Agile/Scrum environment
- Experience in BDD environment and use of a supporting tool preferably SpecFlow
- Experience of testing, development or support of SAAS solutions
- Experience with at least one automated test tool (e.g. Selenium Webdriver, Coded UI)
- Experience using a defect management tool/software (e.g. Team Foundation Server (TFS), Quality Centre, JIRA)
- Recognised Software Testing Qualification/Certification (ISEB/ISTQB)
- Experience of working with a financial reporting software package

Company Description

InsightSoftware.com is a fast growing company specializing in business optimization software and solutions for the ERP market.
